

HYBRID ELEVATOR INC.

MANUFACTURERS OF:
ELEVATORS AND DISABILITY LIFTS

Build Towards a Sustainable Future with Hybrid Elevator

Hybrid Elevator works directly with home builders and developers to provide accessibility solutions for multiple applications.

Baby boomers are one of Canada's largest populations, owning 75% of the countries financial assets and controlling over 50% of discretionary spending in North America. This demographic is looking towards downsizing into a sustainable retirement setting.

Multi-unit complexes are trending away from apartments and condominiums. Demand for multiple level town home and duplex style developments is increasing.

Head Office:

#16-364 Lougheed Road
Kelowna, BC V1X 7R8
